

Procedure

- 1. Connect the Customer Demographics dataset to Tableau.
- 2. Import customer age, gender, and income information.
- 3. Create a bar chart showing the distribution of customer ages.
- 4. Generate a pie chart representing gender distribution.
- 5. Build a table displaying customer demographic details.
- 6. Format charts with labels, legends, and titles.
- 7. Create a dashboard combining all visualizations.
- 8. Add filters and dashboard actions for interactive analysis.

Sheet 3

Custome..
