

Procedure

- 1. Connect the Employee Performance dataset to Tableau.
- 2. Import employee details and performance scores.
- 3. Create a line chart showing employee performance trends.
- 4. Generate a bar chart displaying employee distribution by department.
- 5. Build a table showing employee performance information.
- 6. Add titles, legends, labels, and tooltips.
- 7. Develop a dashboard combining all visualizations.
- 8. Add filters for interactive exploration of employee data.
