Employee Performance Analysis

Dataset (CSV)

Procedure

1. Create the employee performance dataset.
2. Import the dataset into R Studio.
3. Load the required visualization libraries.
4. Generate a line chart showing employee performance scores.
5. Create a bar chart showing department distribution.
6. Build an interactive table containing employee details.
7. Integrate the visualizations into a dashboard.
8. Analyze performance trends and departmental representation.

R Code

```
library(ggplot2)
```

```
library(DT)
```

```
employee <- data.frame(  
  EmployeeID=c(1,2,3),  
  Department=c("Sales","HR","Marketing"),  
  YearsOfService=c(5,3,7),
```

```
PerformanceScore=c(85,92,78)
)
```

```
# Q1 Line Chart
```

```
ggplot(employee,
aes(EmployeeID,PerformanceScore,
group=1))+
geom_line()+
geom_point(size=3)+
labs(title="Employee Performance Trend",
x="Employee ID",
y="Performance Score")
```

```
# Q2 Department Distribution
```

```
dept <- as.data.frame(table(employee$Department))
colnames(dept) <- c("Department","Count")
```

```
ggplot(dept,
aes(Department,Count,
fill=Department))+
geom_bar(stat="identity")+
labs(title="Department Distribution")
```

```
# Q3 Table
```

```
datatable(employee)
```

```
# Q4 Dashboard Components
```

```
# Line Chart + Bar Chart + Table
```
