

Sheet 2

Procedure

1. Connect the Survey Responses dataset to Tableau.
2. Import survey response data for all questions.
3. Create a grouped bar chart showing the distribution of answers for Question 1.
4. Generate a stacked bar chart representing responses across all questions.
5. Build a table displaying survey responses for each respondent.
6. Add chart titles, labels, legends, and formatting.
7. Create a dashboard combining the grouped bar chart, stacked bar chart, and table.
8. Add filters and interactive dashboard actions.
