

Set 15

Procedure

- 1. Connect the Employee Performance dataset to Tableau.
- 2. Import employee details and performance scores.
- 3. Create a line chart showing performance trends.
- 4. Generate a bar chart displaying employee distribution by department.
- 5. Build a scatter plot between years of service and performance score.
- 6. Analyze the relationship between experience and performance.
- 7. Add labels, legends, and chart formatting.
- 8. Create an interactive dashboard combining the visualizations.

Employee Distribution Across Departments
