

Set 15

Procedure

1. Connect the Product Inventory dataset to Tableau.
2. Import product names and quantity information.
3. Create a bar chart showing product quantities.
4. Generate a stacked bar chart for product categories.
5. Create a scatter plot between product price and quantity available.
6. Analyze inventory patterns and stock levels.
7. Add titles, labels, legends, and tooltips.
8. Develop an interactive dashboard combining all visualizations.
